

"Good Morning Neighbors,

For the last month we have had to close the driving range at least once a week due to coins being put in the machine. The machine does not except change. You must come to one of the pro shops and purchase a token. They are \$3 each. Also, we are down to just a couple of baskets for the driving range balls. Prior to season starting I had 12-15 baskets there. As of Tuesday, we were down to 2. Those are the only baskets we have. They belong to ELS. If you do not hit all of the balls that you purchase they need to be taken home in one of your containers not one of the baskets. If we run out of baskets the driving range will be shut down until we get them returned. Finally, my staff has been catching people out in the middle of the driving range picking up golf balls to hit instead of purchasing tokens. This is not allowed. Noone is allowed to be out in the driving range for any reason what so ever. We have had a very busy season so far and myself and my staff love to see that. We just need to make sure that everyone is following these simple rules so we don't lose the opportunity to utilize the driving range. Thank you for taking the time to read this. I know it was long."
